Voted "Best in Berks"  
 4th straight year!

**A Word from the Doctor**

As we welcome the warm weather, a return to the outdoors and all the events of the season, it is especially important to protect your skin and keep it healthy. It has always been my philosophy and that of my practice, to help you achieve that goal by incorporating sound medicine, the latest in dermatological science and technology, and common sense.

For example, many of my patients and countless people residing in and around Berks County are affected by Rosacea, a condition that flares with heat, sun and exercise. Rosacea can be successfully cleared and controlled with physician-grade cleansers, lotions, anti-oxidants and facial treatments. It can also be treated by state-of-the-art **Vbeam®** and **Smoothbeam™ LASERS**, and **BLU-U® with Photodynamic Therapy**, which significantly reverse the symptoms of this disease.

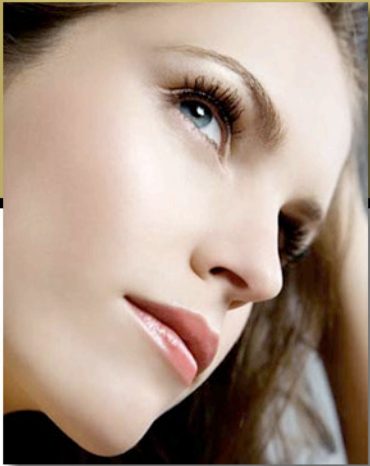

Where does common sense come into play? I advise my patients, friends, family and sometimes even strangers, of the ABC's of sun protection:

- A**void sun exposure;
- B**lock with Sun Block with SPF 30 or more that contains Zinc or Titanium;
- C**over-up with sun-protective clothing.

Of course, when out in the back yard or garden, watch out for poison Ivy, Oak and Sumac. *Leaves of three – Let it be!*  
 So, enjoy the warm weather and have a Skin-Healthy Summer!
